

For the past 4 years and two times a year we have had held a Texas Hold em' client appreciation night. We had used the same group of dealers for at least the last 5 events and the last 3 events we just had not felt that the quality of the dealers and their presentation of our event was what we where really looking for.

After an internet search we had found three other companies that host and set hold em' and casino night events. I called and spoke with one of the partners (Mickey) we talked about what we where looking for and what we expected. I checked the references that Mickey provided and we scheduled the event using 3 Aces.

The night of the event the crew was on site at the correct time, they set up their tables and were ready to go at the start time.

Quality, professional and extraordinary that's how I would describe their organization. Their dealers were friendly, took control of the tables but in a very non-combative way which is exactly what we were looking for after a few problems with the previous dealers. All of their equipment tables, chips everything was impeccable. The three partners ran the event as it should be, took control of every detail.....they even shuttled drinks back and forth to our playing clients.

The entire crew made our event so successful; we will definitely use their services again in the spring.
